## Fish and Vegetable Pan Scale with Extra-Large Dial

Detecto's T3530 hanging scale comes with a deep 15" (38cm) round stainless steel pan, making it the perfect scale for fish, vegetable or product markets. Long term accuracy is guaranteed by Detecto's use of Thermolastic springs which are not affected by extreme temperature variations. An air dashpot that absorbs shock created when commodities are placed on the scale protects the mechanism and increases the scale life.

MODEL	CAPACITY	REVOLUTIONS	UPC CODE
